

MINERAL RESOURCE ESTIMATOR WANTED

Join the OR Royalties team to conduct geological modelling and resource estimation for evaluation of potential investments in mineral resource projects.

JOB SUMMARY:

OR Royalties is seeking an experienced **Mineral Resource Estimator** for a 1-year contract position based in **Montreal**. The ideal candidate will have a strong background in geological modeling and resource estimation, with proven expertise in **Leapfrog software**. Geologists or Engineers In Training with sufficient expertise and drive are welcome to apply. You will play a key role in supporting data interpretation, geological model development, resource estimation and economic evaluations for a variety of commodities and deposit types. It is a great environment to gain experience and confidence in resource estimation skills and mine economics while guided and mentored by skilled and recognized professionals.

WHO WE ARE:

OR Royalties (OR: TSX & NYSE) is an intermediate precious metal royalty company which holds a North American focused portfolio of over 180 royalties, streams, and precious metal offtakes, including 22 producing assets. OR's portfolio is anchored by its cornerstone asset, a 3-5% net smelter return royalty on the Canadian Malartic Complex. OR has deployed over C\$3 billion in the metals and mining sector since its inception in 2014.

KEY RESPONSIBILITIES:

- Analyze geological and assay data from third parties to evaluate risks and opportunities on a variety of deposit types.
- Undertake site visits on producing and developing mining projects.
- Develop and update 3D geological models using Leapfrog.
- Complete resource estimations using various techniques depending on the project.
- Collaborate with a geologist, mining engineer and financial analysts in a fast-paced environment to evaluate investment metrics.
- Help prepare presentations and reports for internal and external stakeholders.

QUALIFICATIONS:

- Degree in Geology, Geological Engineering, or a related field.
- Minimum 2–5 years of experience in mineral resource estimation.
- Proficiency with Leapfrog.
- Strong analytical and communication skills.
- Capacity to work independently to find solutions to deliver on short timelines.
- Bilingual (English and French) preferred.
