CAUTIONARY STATEMENTS

FORWARD-LOOKING STATEMENTS

Certain statements contained in this presentation may be deemed “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995 and “forward-looking information” within the meaning of applicable Canadian securities legislation. Forward-looking statements are statements other than statements of historical fact, that address, without limitation, future events, production estimates of OR Royalties’ assets (including increase of production), the 2026 guidance on GEOs and the 5-year outlook on GEOs included under “Guidance for 2026 and 5-Year Outlook” and other guidance based on disclosure from operators, timely developments of mining properties over which OR Royalties has royalties, streams, offtakes and investments, management’s expectations regarding OR Royalties’ growth, results of operations, estimated future revenues, production costs, carrying value of assets, ability to continue to pay dividend, requirements for additional capital, business prospects and opportunities, future demand for and fluctuation of prices of commodities (including outlook on gold, silver, diamonds, other commodities) currency, markets and general market conditions and the potential extended mine life at Namdini. In addition, statements and estimates (including data in tables) relating to mineral reserves and resources and statements and revised guidance as to gold equivalent ounces are forward-looking statements, as they involve implied assessment, based on certain estimates and assumptions, including the assumptions set out under “Guidance for 2026 and 5-Year Outlook”, and no assurance can be given that the estimates or related guidance will be realized. Forward-looking statements are generally, but not always, identified by the words “expects”, “plans”, “anticipates”, “believes”, “intends”, “estimates”, “projects”, “potential”, “scheduled” and similar expressions or variations (including negative variations), or by statements that events or conditions “will”, “would”, “may”, “could” or “should” occur. Forward-looking statements are subject to known and unknown risks, uncertainties and other factors, most of which are beyond the control of OR Royalties, and actual results may accordingly differ materially from those in forward-looking statements. Such risk factors include, without limitation, (i) with respect to properties in which OR Royalties holds a royalty, stream or other interest; risks related to: (a) the operators of the properties, (b) timely development, permitting, construction, commencement of production, ramp-up (including operating and technical challenges), (c) differences in rate and timing of production from resource estimates or production forecasts by operators, (d) differences in conversion rate from resources to reserves and ability to replace resources, (e) the unfavorable outcome of any challenges or litigation relating to title, permit or license, (f) hazards and uncertainty associated with the business of exploring, development and mining including, but not limited to unusual or unexpected geological and metallurgical conditions, slope failures or cave-ins, flooding and other natural disasters or civil unrest or other uninsured risks; (ii) with respect to other external factors: (a) fluctuations in the prices of the commodities that drive royalties, streams, offtakes and investments held by OR Royalties, (b) fluctuations in the value of the Canadian dollar relative to the U.S. dollar, (c) regulatory changes by national and local governments, including permitting and licensing regimes and taxation policies, regulations and political or economic developments in any of the countries where properties in which OR Royalties holds a royalty, stream or other interest are located or through which they are held, (d) continued availability of capital and financing to OR Royalties or the operators of properties, and general economic, market or business conditions, and (e) responses of relevant governments to infectious diseases outbreaks and the effectiveness of such response and the potential impact of such outbreaks on OR Royalties’ business, operations and financial condition; (iii) with respect to internal factors: (a) business opportunities that may or not become available to, or are pursued by OR Royalties, (b) the integration of acquired assets or (c) the determination of OR Royalties’ Passive Foreign Investment Company (“PFIC”) status. The forward-looking statements contained in this presentation are based upon assumptions management believes to be reasonable, including, without limitation: the absence of significant change in the Company’s ongoing income and assets relating to determination of its PFIC status; the absence of any other factors that could cause actions, events or results to differ from those anticipated, estimated or intended and, with respect to properties in which OR Royalties holds a royalty, stream or other interest, (i) the ongoing operation of the properties by the owners or operators of such properties in a manner consistent with past practice and with public disclosure (including forecast of production), (ii) the accuracy of public statements and disclosures made by the owners or operators of such underlying properties (including expectations for the development of underlying properties that are not yet in production), (iii) no adverse development in respect of any significant property, (iv) that statements and estimates relating to mineral reserves and resources by owners and operators are accurate and (v) the implementation of an adequate plan for integration of acquired assets.

For additional information on risks, uncertainties and assumptions, please refer to the most recent Annual Information Form of OR Royalties filed on SEDAR+ at www.sedarplus.ca and EDGAR at www.sec.gov which also provides additional general assumptions in connection with these statements. OR Royalties cautions that the foregoing list of risk and uncertainties is not exhaustive. Investors and others should carefully consider the above factors as well as the uncertainties they represent and the risk they entail. OR Royalties believes that the assumptions reflected in those forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be accurate as actual results and prospective events could materially differ from those anticipated such the forward-looking statements and such forward-looking statements included in this presentation are not guarantee of future performance and should not be unduly relied upon. In this presentation, OR Royalties relies on information publicly disclosed by other issuers and third-parties pertaining to its assets and, therefore, assumes no liability for such third-party public disclosure. These statements speak only as of the date of this presentation. OR Royalties undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, other than as required by applicable law.

This presentation includes website addresses and references to additional materials found on third parties’ websites. These websites and information contained on or accessible through these websites are not incorporated by reference into, and do not form a part of, this presentation or any other report or document filed by OR Royalties with the Canadian securities regulators or the SEC, and any references to any websites are intended to be inactive textual references only.

SAFE HARBOUR STATEMENT

This presentation has been prepared for informational purposes only in order to assist prospective investors in evaluating an investment in OR Royalties Inc. The information related to mining operators provided in this presentation has been sourced from public disclosure. Inquiries regarding this presentation can be made to the senior management of OR Royalties.

CAUTIONARY NOTE TO U.S. INVESTORS REGARDING MINERAL RESERVE AND MINERAL RESOURCE ESTIMATES

OR Royalties is subject to the reporting requirements of the applicable Canadian securities laws, and as a result, reports its mineral resources and reserves according to Canadian standards. Canadian reporting requirements for disclosure of mineral properties are governed by National Instrument 43-101 (“NI 43-101”). The definitions of NI 43-101 are adopted from those described by the Canadian Institute of Mining, Metallurgy and Petroleum (“CIM”). In a number of cases OR Royalties has disclosed resource and reserve estimates covering properties related to the mining assets that are not based on CIM definitions, but instead have been prepared in reliance upon JORC and S-K 1300 (collectively, the “Acceptable Foreign Codes”). Estimates based on Acceptable Foreign Codes are recognized under NI 43-101 in certain circumstances. New mining disclosure rules under Subpart 1300 of Regulation S-K became mandatory for U.S. reporting companies beginning with the first fiscal year commencing on or after January 1, 2021. CIM definitions are not identical to those of the Acceptable Foreign Codes, the resource and reserve definitions and categories are substantively the same as the CIM definitions mandated in NI 43-101 and will typically result in reporting of substantially similar reserve and resource estimates. Nonetheless, readers are cautioned that there are differences between the terms and definitions of the CIM and the Acceptable Foreign Codes, and there is no assurance that mineral reserves or mineral resources would be identical had the owner or operator prepared the reserve or resource estimates under another code.

Mr. Guy Desharnais, PhD., P.Geo., is the qualified person for this presentation as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects and has reviewed and verified the technical information contained herein. Mr. Desharnais is an employee of OR Royalties and is non-independent.

SENIOR-QUALITY PORTFOLIO, LEADING GROWTH POTENTIAL

TSX | NYSE: OR

◆ Senior-quality precious metals portfolio

24 producing assets⁽ⁱ⁾ anchored by a 5% NSR royalty on Agnico Eagle's Canadian Malartic Complex⁽ⁱⁱ⁾

◆ Peer-leading organic growth profile

Attributable GEO¹ delivery growth of ~50% based on current 5-year outlook for 2030E (120-135k GEOs)

◆ Highest concentration of producing assets in low-risk Tier-1 mining jurisdictions⁽ⁱⁱⁱ⁾

On a Net Asset Value basis & vs. relevant RoyaltyCo peers

◆ Strong balance sheet & disciplined capital allocation strategy

~\$992 million in available liquidity as of December 31, 2025 between cash and undrawn revolving credit facility (incl. uncommitted \$200 million accordion)

(i) Producing asset list now includes Compañía de Minas Buenaventura S.A.A.'s San Gabriel Mine in Peru and Ramelius Resources Ltd.'s Dalgara Mine in Australia. (San Gabriel included for illustrative purposes only at this time, as transaction to acquire the Portfolio of royalties from Gold Fields Limited, including a 1.5% NSR Royalty covering San Gabriel isn't expected to close until early in the second quarter of 2026).

(ii) Canadian Malartic Open Pits 5.0% NSR Royalty; Canadian Malartic Odyssey Underground Blended 4.61% NSR Royalty

(iii) Also, highest concentration of producing AND development assets (based on Net Asset Value) vs. precious metals royalty & streaming peers; 'Tier-1' mining jurisdictions defined as: Canada, USA, Australia

CORE BENEFITS OF OR ROYALTIES' ROYALTY & STREAMING BUSINESS MODEL

OR ROYALTIES: GROWTH-ORIENTED PRECIOUS METALS ROYALTY COMPANY

- ◆ Simple and efficient business model:
 - ◆ High asset and cash flow diversification
 - ◆ No capital cost requirements
 - ◆ Predictable operating costs
 - ◆ Insulated from rising geopolitical risks
 - ◆ High leverage to gold
 - ◆ Free upside to additional ounces found
- ◆ Focus on pure play precious metal royalty and stream investments
- ◆ DISCIPLINED approach to capital allocation
- ◆ Committed to remain accountable to this strategy

AN ATTRACTIVE INVESTMENT PROPOSITION

10+ YEAR TRACK RECORD OF CONSISTENT GROWTH IN PER SHARE METRICS

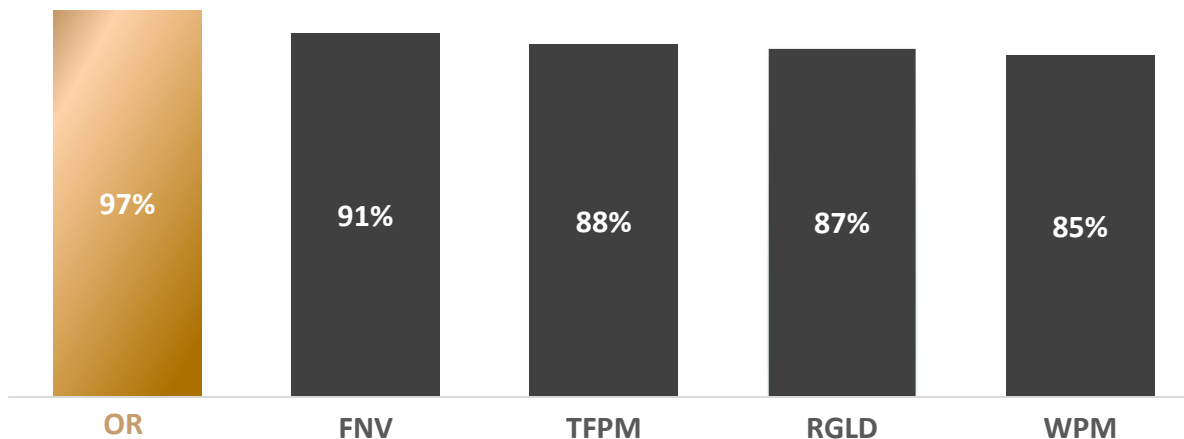

WHY OR ROYALTIES? TIER-1 MINING JURISDICTIONS + MARGIN MATTERS

NAV BREAKDOWN BY JURISDICTION (%)

- ◆ **Highest Exposure** to Tier-1 Mining Jurisdictions⁽ⁱ⁾ vs. relevant precious metals royalty & streaming peers
- ◆ GEOs earned *in-line with* NAV exposure: 73% of GEOs earned in 2025 from Tier-1 Mining Jurisdictions⁽ⁱ⁾ vs. Tier-1 NAV exposure at 76%

2025 CASH MARGIN (%)^{2,6}

- ◆ **Margin Matters** → OR Royalties' cash margin is peer-leading
- ◆ OR's cash margin was **10.1% higher** vs. average of relevant peer set in 2025 due to the highest proportional GEO contribution vs. peers from *royalty* assets
- ◆ **OR Royalties & its shareholders earn ~\$0.97 of every dollar of revenue generated⁽ⁱⁱ⁾**

Note: TFPM classifies some of its gold pre-pay costs as non-cash. These have been included in the cash margin calculation to comport with the definition of cash margin utilized by OR Royalties.

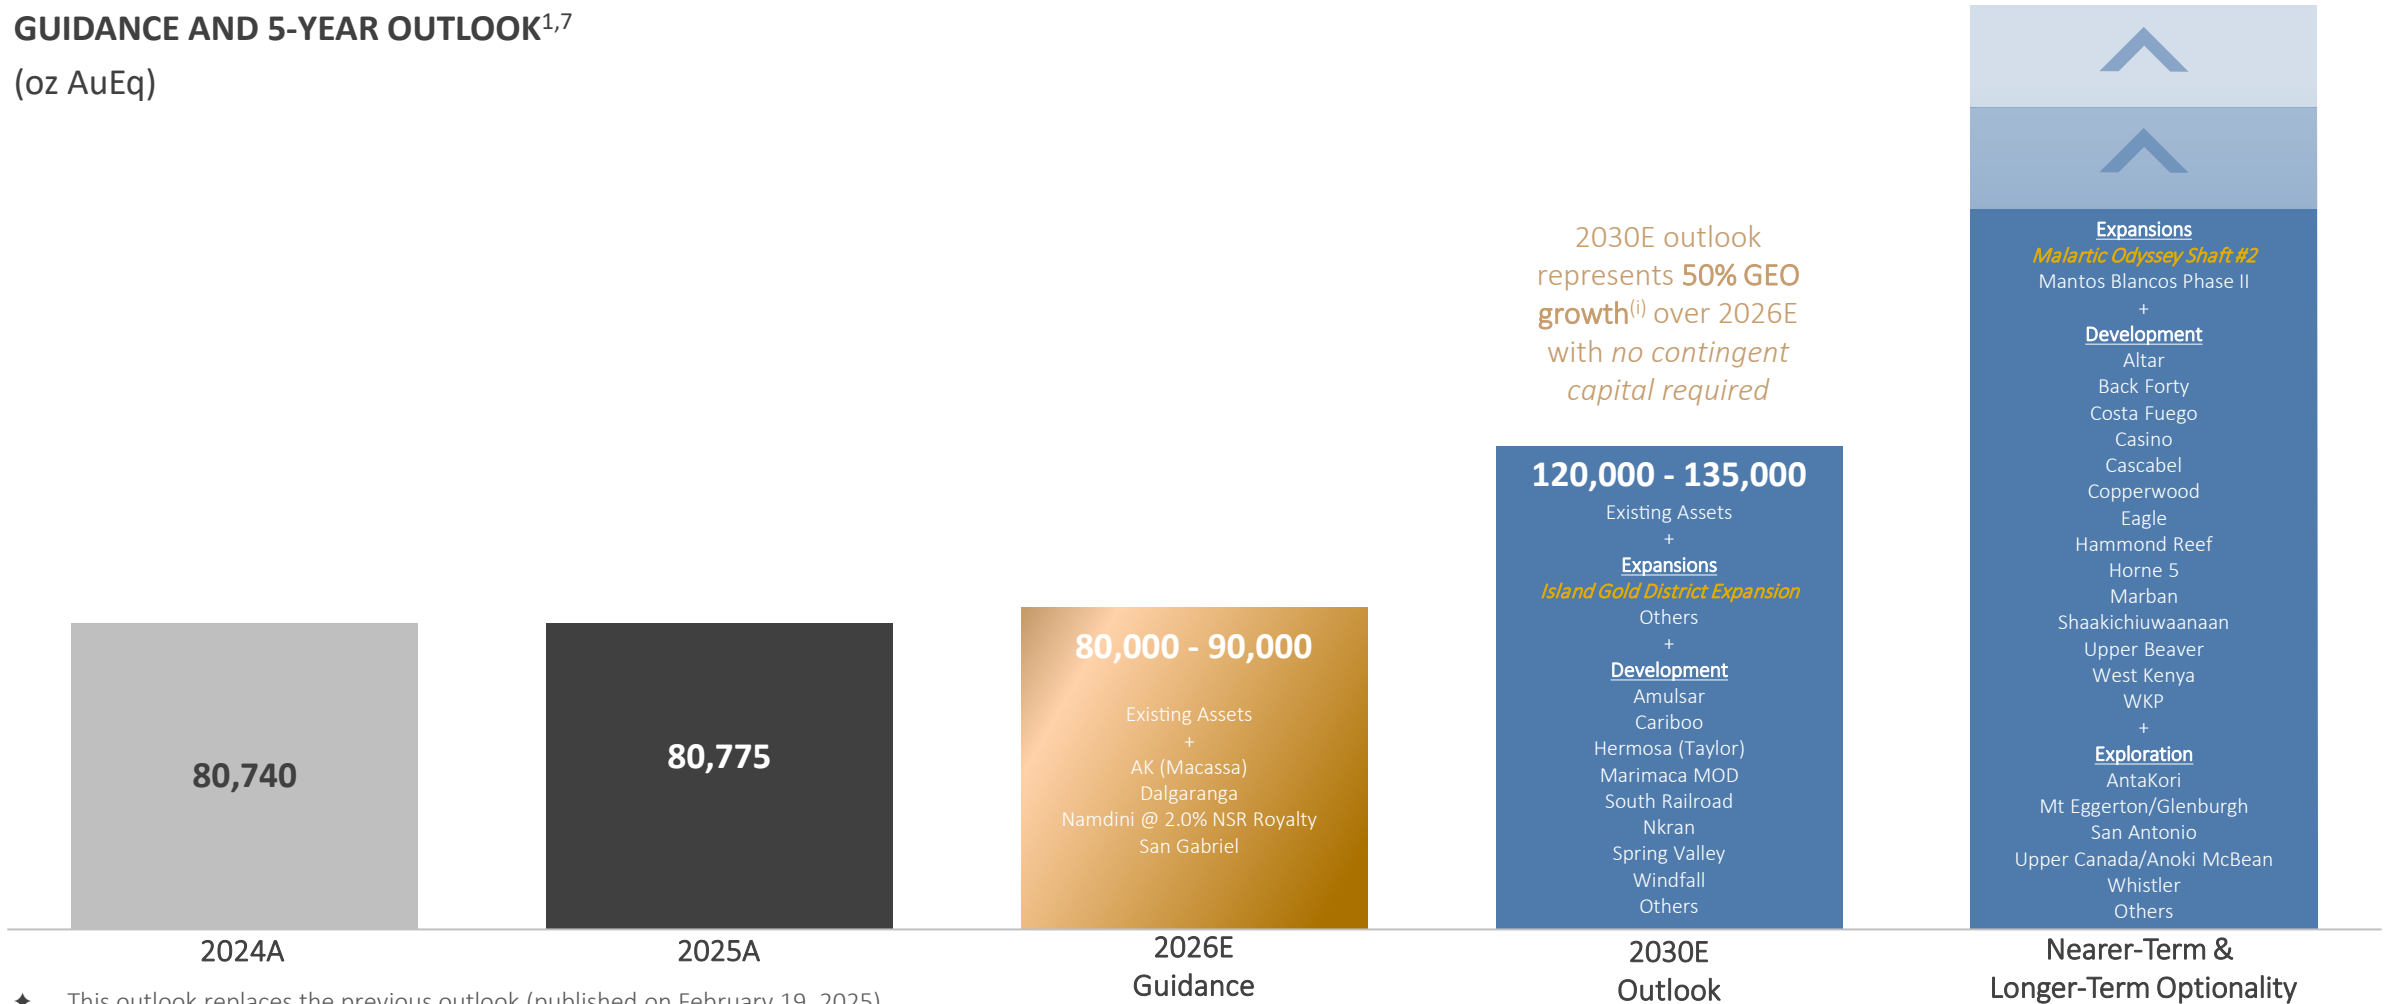

(i) Canada, USA, Australia
(ii) Before depletion, interest, taxes, G&A, and finance costs

WHY OR ROYALTIES? GEO GROWTH THROUGH TO THE END OF THE DECADE...

GUIDANCE AND 5-YEAR OUTLOOK^{1,7}

(oz AuEq)

- ◆ This outlook replaces the previous outlook (published on February 19, 2025).
- ◆ The 2026 outlook (published on February 18, 2026) is based on publicly available forecasts from our operating partners. When publicly available forecasts on properties are not available, OR Royalties obtains internal forecasts from the producers or uses management’s best estimate.
- ◆ The 2026 guidance uses current 2026 consensus commodity prices and a gold/silver price ratio of 73:1. The 5-year outlook uses current long-term consensus commodity prices and a gold/silver price ratio of 82:1.
- ◆ Optionality bar is illustrative only:
 - “Development” defined as partner having at least completed a Preliminary Economic Assessment (or more) on the project;
 - “Exploration” defined as partner having completed a Mineral Resource Estimate (MRE) on the project or is in the process of exploratory drilling in or to be working towards an initial MRE.

(i) Based on mid-points of 2026E GEO Guidance & 2030E GEO Outlook Ranges, respectively.

WHY OR ROYALTIES? A HIGH-QUALITY PORTFOLIO⁸

High-quality development assets continue to advance...What Greenfield Projects are Included in OR Royalties' 5-Yr Outlook for 2030e?

| | Project Name (Commodities) | NSR / Stream | GEO/y | Company | Country | Key Milestones |
|--------------|---------------------------------------|---|----------------|-----------------------|---------|--|
| INCLUDED | SPRING VALLEY (Au) | 1.0-6.0% NSR ⁽ⁱ⁾ | ~10,000-12,000 | SOLIDUS RESOURCES LLC | USA | FIRST PRODUCTION ANTICIPATED FOR H1 2028 ⁽ⁱ⁾ |
| | CARIBOO (Au) | 5.0% NSR | ~9,000-10,000 | OSISKO DEVELOPMENT | Canada | ANNOUNCEMENT OF CONSTRUCTION START ANTICIPATED FOR Q2 2026 |
| | WINDFALL (Au) | 2.0-3.0% NSR | ~6,000-7,000 | GOLD FIELDS | Canada | FIRST PRODUCTION ANTICIPATED FOR Q1 2029 |
| | AMULSAR (Au, Ag) | 3.34% Au Stream 49.22% Ag Stream | ~6,000 | LYDIAN ARMENIA | Armenia | CONSTRUCTION UNDERWAY; FIRST PRODUCTION ANTICIPATED FOR H1 2027 |
| | HERMOSA/TAYLOR (Ag, Zn, Pb) | 1.0% NSR | ~3,000 | SOUTH32 | USA | FIRST PRODUCTION SCHEDULED FOR H1 2027 (FULL RAMP-UP BY H1 2030) |
| | MARIMACA MOD (Cu) | 1.0% NSR | ~1,500 | marimaca | Chile | PROJECT IS POSITIONED TO BE CONSTRUCTION-READY BY H2 2026 |
| | SOUTH RAILROAD (Ag) | 100% Ag Stream | ~500-1,000 | ORLA MINING | USA | FIRST PRODUCTION SCHEDULED FOR H2 2027 |
| NOT INCLUDED | UPPER BEAVER ⁽ⁱⁱ⁾ (Au, Cu) | 2.0% NSR | ~4,000 | AGNICO EAGLE | Canada | MINE RAMP-UP CURRENTLY EXPECTED FOR 2030 ⁽ⁱⁱ⁾ |
| | EAGLE (Au) | 5.0% NSR | ~7,500-10,000 | - | Canada | NEW PROJECT OWNER EXPECTED TO BE ANNOUNCED IN 2026 |
| | CASCABEL (Au, Cu) | 3.0% Au Stream ⁽ⁱⁱⁱ⁾ 0.6% NSR ^(iv) | - | - | Ecuador | JIANGXI COPPER COMPANY LIMITED CLOSED ACQUISITION IN Q1 2026 |

(i) OR Royalties owns a 4.0% to 6.0% NSR royalty on the core of the Spring Valley deposit, and a 1.0% NSR royalty on the peripheral claims. The majority of the current pit constrained Mineral Resource sits within OR Royalties' 6.0% NSR royalty area (the "Schmidt Claims"). Royalties on the Schmidt Claims become payable once 500koz Au are recovered from the Schmidt Claims;

(ii) Agnico Eagle's Upper Beaver currently not included in OR Royalties 5-year outlook GEO delivery range of 120,000 – 135,000 GEOs for 2030e; first royalty payments likely expected in 2031, though could come in 2030 depending on timing of production ramp up in 2030.

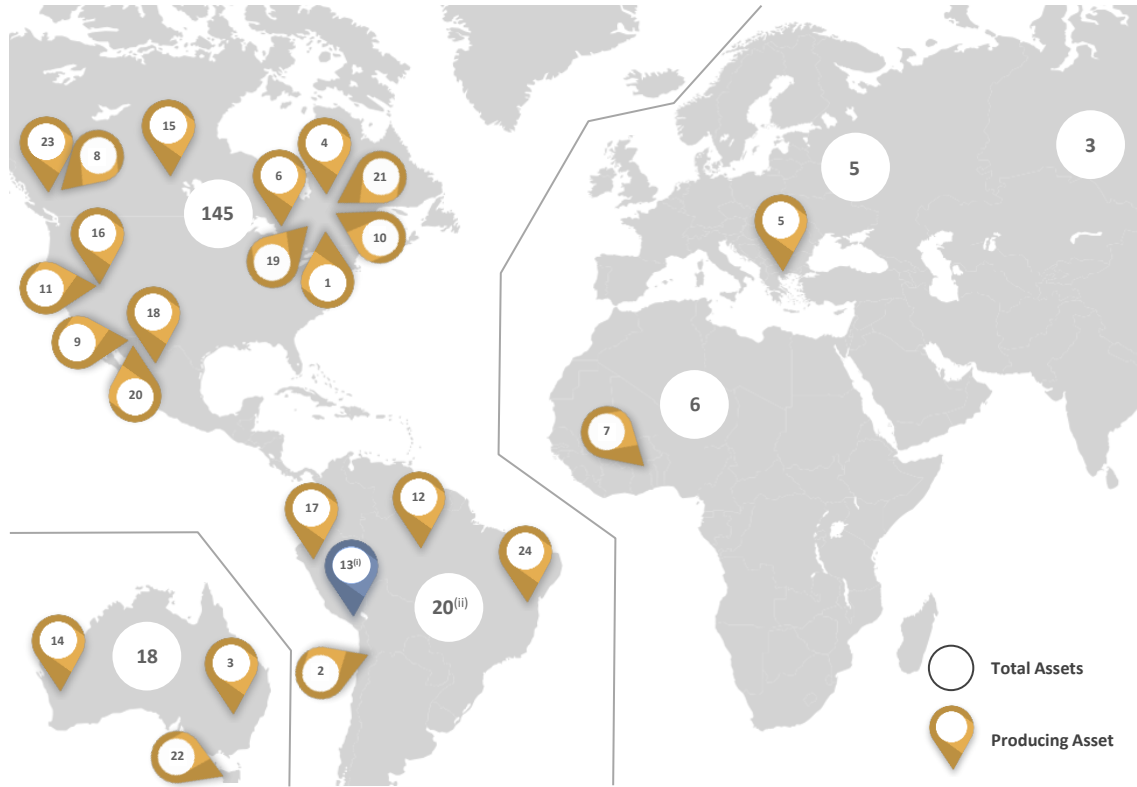

(iii) 3.0% gold stream of the contained gold produced from Cascabel until 225,000 ounces of gold have been delivered, and 1.8% thereafter for the remaining life of the mine.

(iv) Cascabel's owner, Jiangxi Copper Company Limited, has the right to buy down one-third of the NSR (ie. down to a 0.4% NSR Royalty) until November 2026. Beginning in 2030 and until the end of 2039, OR Royalties will receive minimum annual payments under the NSR of \$4 million, even if the mine is not yet in production.

Note: Average GEOs based on publicly available forecasts from our operating partners. When publicly available forecasts on properties are not available, OR obtains internal forecasts from the producers or uses management's best estimate.

WHY OR ROYALTIES? A HIGH-QUALITY PORTFOLIO with 24 PRODUCING ASSETS⁽ⁱ⁾

PRODUCTION, DEVELOPMENT & EXPLORATION

(i) San Gabriel included for illustrative purposes only at this time, as transaction to acquire the Portfolio of royalties from Gold Fields Limited, including a 1.5% NSR Royalty isn't expected to close until early in the second quarter of 2026.
 (ii) San Gabriel NSR Royalty currently not included in total asset count numbers, as transaction to acquire the Portfolio of royalties from Gold Fields Limited, including a 1.5% NSR Royalty covering San Gabriel isn't expected to close until early in the second quarter of 2026.
 (iii) First production announced in Ramelius Resources Ltd.'s March 2026 Quarterly Production Update and dated April 7th, 2026.

CANADIAN MALARTIC COMPLEX

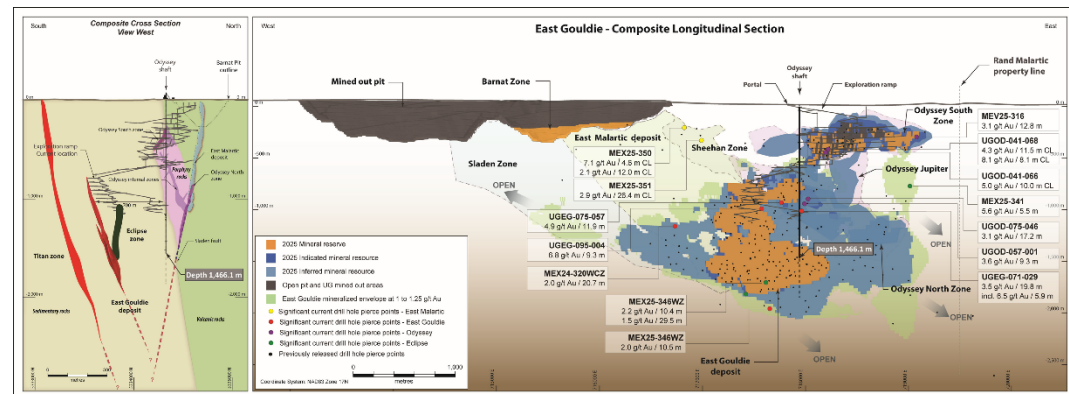

Barnat Pit/Stockpile, East Gouldie, Odyssey South & western half of East Malartic - 5.0% NSR Royalty

+ Odyssey North and eastern half of East Malartic – 3.0% NSR Royalty

+ Any ore processed from outside CM property – C\$0.40/t Mill Royalty

Québec, Canada | Agnico Eagle Mines Limited

- ◆ From 2025-27, production is expected to be sourced from the Barnat Pit and increasingly complemented by ore from Odyssey and low-grade stockpiles. Updated overall CMC production guidance is for 585koz in 2026 and 655koz in 2027, and 735koz in 2028⁹
 - ◆ Odyssey is expected to contribute ~120koz Au in 2026 & ~240koz in 2027, and ~450koz Au in 2028⁹
- ◆ Complex expected to have ~40ktpd of excess mill capacity starting in late 2028 or 2029 (after mine transitions to 100% underground at Odyssey)⁹
- ◆ Shaft #2 at Odyssey Underground currently officially in “technical evaluation” phase, along with “Fill the Mill / Path to 1.0Moz” with results expected EOY 2026; infill drilling and MRE expansion drilling currently underway (~20 rigs in 2026)⁹
 - Shaft #1 (+ Ramp) results in 20ktpd of throughput, with a potential Shaft #2 adding an additional 8-10ktpd of ore⁹
 - Estimated annual gold production in a two-shaft scenario of 750-800koz per annum (~550koz pa Au for Shaft #1, and ~225koz Au pa for Shaft #2)¹⁰
 - Shaft #2 could add ~10-15k GEOs to OR’s annual earned GEOs *over and above* current levels (no additional cost to OR); first prod’n expected 2033^{(i),9}
- ◆ Regional opportunities to “Fill the Mill” currently being studied for Marban (~0.9% NSR royalty + mill tonnage royalty to OR) at 14-16ktpd starting in 2033, as well as Wasamac at 3ktpd (*only the mill tonnage royalty would apply to OR*)⁹
- ◆ Final permits, along with FID on 2nd Shaft and Marban, expected H1 2028⁹

“Significant growth of MRMR since June 2023 study supports potential for meaningful mine life extension and a larger production profile; Odyssey is a multi-decade, world-class asset.”

Ammar Al-Joundi,
President & CEO of
Agnico Eagle Mines Ltd.
February 2026

Source: Agnico Eagle Mines Ltd. (February 2026)

(i) Projected GEOs estimated internally by OR Royalties Inc. based on publicly released information from the operator. Estimates based on the following assumptions: 10,000 tpd of additional ore tonnage; average gold grade of 2.75 g/t Au; 94.6% overall gold recovery; and a 4.61% blended u/g NSR Royalty rate¹¹

ISLAND GOLD DISTRICT (IGD)

1.38-3% NSR Royalty at Island Gold (Underground) Mine
 3% NSR Royalty on Eastern Limit of planned Magino Open Pit
 Ontario, Canada | Alamos Gold Inc.

- ◆ One of Canada’s highest-grade and lowest-cost underground gold mines located near Wawa, Ontario
 - ◆ February 2026 Proven and Probable Reserves Update at Island Gold Underground of 15.1Mt grading 10.61 g/t Au for 5.1Moz Au → 10th consecutive year of gold inventory growth¹²
- ◆ Island Gold District Expansion Study complete with results presented in February 2026; full NI 43-101 expected in March 2026:
 - ◆ Phase 3+ Expansion (first shaft) remains on track for completion in Q4 2026, with infrastructure designed to support higher underground mining rates of 3,000 tpd (+25% from previous)¹²
 - ◆ Island Gold District (incl. Magino) → average annual gold production of 534,000 ounces over 10 years post-expansion (2028+)¹²
- ◆ The expanded and accelerated mine plan is also anticipated to transition a greater proportion of production towards OR’s 2% and 3% NSR royalty. The updated blended royalty over LOM is ~2.34% NSR

1. 10-year period post Expansion completion from 2028 to 2037, 15-year average from 2026 to 2040
2. Please refer to Cautionary Notes on non-GAAP Measures and Additional GAAP Measures
3. For the purposes of calculating mine-site all-in sustaining costs, the Company does not include an allocation of corporate administrative expense and corporate share-based compensation expense

“The evolution and growth of Island Gold continues with another substantial increase in Mineral Reserves supporting another high-return expansion of the operation. Given our significant ongoing exploration success within the main Island Gold Structure... we are confident there is further growth and upside to come.”

John A. McCluskey,
 President & CEO of
 Alamos Gold Inc.
 February 2026

SAN GABRIEL (*NEW*)

- ◆ Buenaventura announced first gold (and silver) production from San Gabriel in December 2025¹³. Commercial production is expected to be achieved towards the end of 2026
- ◆ At the effective date of December 31, 2024, total underground Proven and Probable Mineral Reserves at San Gabriel were estimated at 15.3Mt at 3.71 g/t Au and 6.32 g/t Ag **containing 1.8Moz Au & 3.1Moz Ag**¹⁴
 - ◆ The December 2024 MRE supports a current mine life of 14.6 years¹⁴
- ◆ Mill throughput is expected to ramp up from 2,000tpd in 2026, to 3,100tpd in 2028 onwards. **An expansion to 4,000tpd** is expected to be completed towards the end of this decade (Phase 2)¹⁴
- ◆ Production guidance is currently 48-55koz Au in 2026¹⁵, 90-95koz Au in 2027, and 95-110koz Au¹⁴ from 2028 onwards until the expected mill expansion
- ◆ Buenaventura is an experienced, Peruvian-based miner and project developer, operating multiple mines throughout Peru for over 70 years

Production Outlook (koz Au)

"In terms of the long run, we will be witness of the Phase 2 of San Gabriel that we plan to treat 4,000 tonnes per day."

After-tax cash flows were converted to USD using the average rate in the quarter earned. Consensus NAV figures were converted to USD using the spot rate as at the relevant estimate date. (ii) Mantos Blancos and Island Gold were acquired as part of broader portfolio transactions. For Island Gold, the investment reflects the acquisition of an 85% interest from Teck Resources Limited in 2016 and the remaining 15% from Caisse de dépôt et placement du Québec (CDPQ) in 2020. Investment amounts for asset acquired in portfolios reflect the purchase price allocated to each asset. An additional deposit of US\$25M was made for Mantos Blancos in 2019 to reduce the transfer price and increase the tail stream percentage. For Canadian Malartic, the investment is assumed to be C\$420 million, representing the C\$575 million implied value of "Spinco" shares distributed to Osisko Mining Corporation shareholders in the 2014 joint acquisition by Agnico Eagle Mines Limited and Yamana Gold Inc., net of the C\$155 million in cash held by OR Royalties Inc. at inception. (iii) As at December 31, 2025. Cumulative after-tax cash flow figures represent estimates derived from previously disclosed information. After-tax cash flows by asset were estimated by deducting attributable cost of sales and cash taxes from asset-level revenues. Revenues were based on reported quarterly GEOs multiplied by the average gold price in each quarter. Estimated cash costs of sales assume a C\$3.00/oz transport and refining cost for Canadian Malartic, C\$3.25/oz for Island Gold, C\$4.00/oz for Eagle, an 8% transfer price for Mantos Blancos as of Q4 2019 and a 25% transfer price from acquisition to Q3 2019, and a 4% transfer price for CSA. No cash taxes were paid on any of the select assets as at December 31, 2024. Attributable cash taxes tax liability of approximately US\$9.1M and US\$1.0M for Canadian Malartic and Island Gold respectively assumed for 2025. (iv) As at December 31, 2025. Collected from covering analysts in December 2025. (v) Total including consensus NAV as at 2024-06-24, when operations at Eagle were stopped due to a slope failure at the heap leach.

CAPITAL ALLOCATION: RETURNS TO SHAREHOLDERS

CUMULATIVE DIVIDEND RETURNED SINCE INCEPTION⁽ⁱ⁾ (US\$M)

- ◆ Over \$279 million returned to shareholders in dividends as of January 15, 2025⁽ⁱ⁾
- ◆ Quarterly dividend of US\$0.055 per common share (22% increase in 2025⁽ⁱⁱ⁾)
- ◆ Current Dividend yield of 0.55%
- ◆ A total of ~9.1 million shares repurchased (~\$118 million⁽ⁱⁱⁱ⁾ since the Company's inception)
 - ◆ 1.1 million shares repurchased for \$36.7 million in 2025

HIGH MARGIN BUSINESS RETURNING CAPITAL ACROSS COMMODITY CYCLES

(i) OR Royalties's dividend was historically denoted in C\$. Historic dividends converted to US\$ at the quarterly average USD:CAD exchange rate for the quarter of record for a given dividend.

(ii) Based on the foreign exchange rate (C\$/US\$) on the declaration date of the first quarter dividend.

(iii) Historic NCIB buybacks converted to US\$ using using annual average USD:CAD FX rates of 1.3245 for 2016; 1.2986 for 2017; 1.2957 for 2018; 1.3269 for 2019; 1.3415 for 2020; 1.2535 for 2021; 1.3013 for 2022; 1.3497 for 2023; 1.3698 for 2024; and 1.3971 for 2025.

BALANCE SHEET STRENGTH

| BALANCE SHEET ITEMS (\$ M) | March 31, 2026 |

ADDITIONAL KEY PRODUCING ASSETS

MANTOS BLANCOS

100% Ag Stream
Antofagasta, Chile | Capstone Copper Corp.

- ◆ Phase I Expansion mill processing rate increased to 20ktpd (from 11.5ktpd) & mine life currently out to 2038⁸
- ◆ Phase I Expansion steady-state throughput of 20ktpd achieved throughout 2025 with installation of key additional infrastructure in Aug 2024²⁰
- ◆ Anticipated increase in mined and processed silver grades through Mantos Blancos mill in H1 2026⁸
- ◆ Feasibility Study for Phase II Expansion to at least 27ktpd expected in H1 2026 to further increase metal production²⁰

DALGARANGA

1.44% GRR Royalty
Western Australia, Australia | Ramelius Resources Ltd.

- ◆ October 28, 2025 Maiden Mineral Ore Reserve for Dalgaranga of 7.0Mt grading 7.3 g/t Au for a total of 1.6Moz Au (incl. both Never Never and Pepper underground orebodies)²¹
- ◆ The Pre-feasibility Study outlines an 11-yr LOM plan²¹
- ◆ Dalgaranga Integration Study is based on a single processing facility option, at Ramelius' Mt Magnet Hub, with plant expansions planned for up to 5Mtpa processing capacity²¹
- ◆ First ore from Dalgaranga processed at Mt Magnet mill in March 2026; Dalgaranga expected to produce >250koz Au by FY30^{21,22}

ÉLÉONORE

2.2-3.5% NSR Royalty
Québec, Canada | Dhilmar Ltd.

- ◆ Gold production from Éléonore totaled 232koz and 240koz in 2023 and 2024, respectively.²³ In 2025 OR received 5.1koz from Éléonore, translating to ~233koz at the asset level (*note: that due to payment delays, annual deliveries to OR may not exactly match annual asset production*)
- ◆ OR Royalties has a 2.2-3.5% NSR royalty on Éléonore, with a sliding scale based on production, with maximum capped at 3.5%; assuming similar production rates under Dhilmar Ltd., the royalty rate is expected to reach 2.475% in 2026²⁴

SASA

100% Silver Stream
North Macedonia | Central Asia Metals plc

- ◆ An updated mine plan announced in March 2026 reduced the mine life to 2034 (previously 2039) based on currently defined Svinja Reka Mineral Reserves and Resources²⁵
- ◆ 2025 production of 17.9kt of zinc-in-concentrate and 25.1kt lead-in-concentrate²⁶
- ◆ Guidance for 2026 is metal-in-concentrate production of 18-20kt of zinc and 26-28kt of lead²⁶
- ◆ Following the comprehensive business review of Sasa in the second half of 2025, measures were completed to reduce costs, increase sampling, and focus on long-term mine planning²⁶

LAMAQUE COMPLEX

1.0% NSR Royalty
Québec, Canada | Eldorado Gold Corporation

- ◆ 2026 production guidance of 185,000 to 200,000 oz Au; midpoint slightly lower than 2025 production of 187,208 oz Au²⁷
- ◆ In 2025, Lamaque Complex Mineral Reserves increased 25% driven by conversion at Ormaque and Triangle, in addition to declaring initial Mineral Reserves at Plug #4²⁸
- ◆ Mineral Reserve life of mine currently at 8 years despite and additional year of depletion (through 2033)²⁸
- ◆ March 2026 receipt of Operating Authorization for the Ormaque Deposit + *studies ongoing to increase Lamaque Complex mill capacity from current 2,500tpd to 5,000tpd (already permitted)*²⁹

GIBRALTAR

100% Silver Stream
British Columbia, Canada | Taseko Mines Limited

- ◆ Proven & Probable Reserves collectively recently increased by 40%; Proven Reserves at 509Mt grading 0.254% Cu, and Probable Reserves at 191Mt grading 0.23% Cu³⁰
- ◆ Taseko announced signing of a definitive agreement to purchase Sojitz's 12.5% effective interest in Gibraltar for a minimum of \$60M over a five-year period³¹
- ◆ Amendments completed to increase the effective stream percentage by 12.5% to 100%; in addition, the step-down delivery threshold was extended 6,811,603 ounces delivered, accounting for OR Royalties' additional silver ownership³²

SUPPORTIVE ACTIVE SHAREHOLDERS

EXTENSIVE ANALYST COVERAGE

ENDNOTES

1. GEOs are calculated on a quarterly basis and include royalties and streams. Silver ounces and copper tonnes earned from royalty and stream agreements are converted to gold equivalent ounces by multiplying the silver ounces or copper tonnes by the average silver price per ounce or copper price per tonne for the period and dividing by the average gold price per ounce for the period. Cash royalties, other metals and commodities are converted into gold equivalent ounces by dividing the associated revenue by the average gold price per ounce for the period. For average metal prices used, refer to the Portfolio of Royalty, Stream and Other Interests section of the MD&A for the year ended December 31, 2025 and published February 18th, 2026.
2. Cash margin is a non-IFRS financial performance measure which has no standard definition under IFRS. It is calculated by deducting the cost of sales (excluding depletion) from the revenues. Please refer to the non-IFRS measures provided under the Non-IFRS Measures section of OR Royalties' MD&A for the year ended December 31, 2025 and published February 18, 2026. A cash margin of 96.5% was reported for 2024 and a cash margin of 96.7% was estimated for 2025; https://osiskogr.com/app/uploads/2025/02/OR-Q4-2024-MDA_En_Final_for-filing.pdf
3. Broker research, as at market close on April 6, 2026.
4. Operating cash flow per share is calculated by dividing net cash flows provided by operating activities from the royalties, streams and other interests segment for the year by the average number of basic common shares outstanding for the year. For 2022, 2023, and 2024, reported US\$ values were used. For 2015 to 2021, reported C\$ value were converted using the average annual CADUSD rate for a given year. USD:CAD FX rates of 1.2785 for 2015; 1.3245 for 2016; 1.2986 for 2017; 1.2957 for 2018; 1.3269 for 2019; 1.3415 for 2020; and 1.2535 for 2021.
5. Analyst consensus NAV per share as at December 31st of given year. Value for 2025 retried from FactSet on February 17, 2026. Historic data retrieved from FactSet on March 24, 2025.

15. Refer to Compañía de Minas Buenaventura S.A.A.'s press release titled "Buenaventura Announces Fourth Quarter 2025 Results for Production and Volume Sold per Metal" and dated February 17, 2026.
16. Mineral Resource and Mineral Reserve figures are only estimates. Such estimates are expressions of judgment based on knowledge, mining experience, analysis of drilling results, and industry practices. While OR Royalties believes that the Mineral Resource and Mineral Reserves estimates, as applicable, in respect of properties in which OR Royalties holds royalties, streams, or other interests reflect best estimates performed by or on behalf of the owner of such properties, the estimating of Mineral Resource and Mineral Reserves is a subjective process and the accuracy of Mineral Resource and Mineral Reserve estimates is a function of the quantity and quality of available data, the accuracy of statistical computations, and the assumptions used and judgments made in interpreting available engineering and geological information. There is significant uncertainty in any Mineral Resource and Mineral Reserve estimate and the actual deposits encountered and the economic viability of a deposit may differ materially from estimates. Estimated Mineral Resource and Mineral Reserves may have to be re-estimated based on changes in prices of gold or other minerals, further exploration or development activity, or actual production experience. This could materially and adversely affect estimates of the volume or grade of mineralization, estimated recovery rates, or other important factors that influence such estimates. In addition, there is no assurance that any Mineral Resource estimate will ultimately be reclassified as proven or probable Mineral Reserves. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability. If operators reduce their Mineral Reserves and Mineral Resources on properties underlying OR Royalties' royalties, streams, or other interests, this may result in a material and adverse effect on OR Royalties' profitability, results of operations, financial condition, and the trading price of OR Royalties' securities. The Mineral Resources disclosed are based on the best available information as of April 11, 2025. Resources are exclusive of reserves in all cases. Gold equivalent ounces comprise mostly gold, other elements are converted assuming forecast long-term prices from analyst consensus published on March 3, 2025. Attributable GEOs were compiled without consideration for the potential mining or metallurgical recovery of the metals contained in the mineral resource or reserve. Detailed Resource and Reserve estimation and applicable royalty or stream interests can be found at in the following appendix pages and at www.orroyalties.com.
17. The market value corresponds to the quoted price of the investments (including OR Royalties' position in Osisko Development Corp.) in a recognized stock exchange as at December 31, 2025.
18. Including the US\$200 million accordion, which is uncommitted and subject to acceptance by the lenders.
19. Refer to "The Royalty Rundown: Precious Metals Streaming Quarterly Review – Q1/25" published by Scotiabank GBM Precious Metals Research on March 26, 2025. RGLD NAV from production computed using RGLD and SSL NAVs in report.

Notes on Mineral Reserves & Mineral Resources:

- * These values are estimates based on best available information as of April 11, 2025. The reader is advised to follow the provided links to find the source and descriptions of the original estimates and the risks associated with the individual projects. Osisko can not verify and does not take responsibility of the accuracy of the estimates provided here.
- * Resources are exclusive of reserves in all cases.
- * Inferred Resources have not demonstrated economic viability, and there is no certainty that they can be upgraded to reserves.

(i) Mineral Resource and Mineral Reserve figures are only estimates. Such estimates are expressions of judgment based on knowledge, mining experience, analysis of drilling results, and industry practices. While OR Royalties believes that the Mineral Resource and Mineral Reserves estimates, as applicable, in respect of properties in which OR Royalties holds royalties, streams, or other interests reflect best estimates prepared by or on behalf of the owner of such properties, the estimating of Mineral Resource and Mineral Reserves is a subjective process and the accuracy of Mineral Resource and Mineral Reserve estimates is a function of the quantity and quality of available data, the accuracy of statistical computations, and the assumptions used and judgments made in interpreting available engineering and geological information. There is significant uncertainty in any Mineral Resource and Mineral Reserve estimate and the actual deposits encountered and the economic viability of a deposit may differ materially from estimates. Estimated Mineral Resource and Mineral Reserves may have to be re-estimated based on changes in prices of gold or other minerals, further exploration or development activity, or actual production experience. This could materially and adversely affect estimates of the volume or grade of mineralization, estimated recovery rates, or other important factors that influence such estimates. In addition, there is no assurance that any Mineral Resource estimate will ultimately be reclassified as proven or probable Mineral Reserves. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability. If operators reduce their Mineral Reserves and Mineral Resources on properties underlying OR Royalties' royalties, streams, or other interests, this may result in a material and adverse effect on OR Royalties' profitability, results of operations, financial condition, and the trading price of OR Royalties' securities. The Mineral Resources disclosed are based on the best available information as of April 11, 2025. Resources are exclusive of reserves in all cases. Gold equivalent ounces comprise mostly gold, other elements are converted assuming forecast long-term prices from analyst consensus published on March 3, 2025. Attributable GEOs were compiled without consideration for the potential mining or metallurgical recovery of the metals contained in the mineral resource or reserve.

2025 MINERAL RESERVES AND RESOURCE: DEVELOPMENT ASSETS⁽ⁱ⁾

MINERAL RESERVES AND MINERAL RESOURCES

As of April 11, 2025 with best available public information. Resources are exclusive of Reserves.

(i) Mineral Reserve and Mineral Resource figures are only estimates. Such estimates are expressions of judgment based on knowledge, mining experience, analysis of drilling results, and industry practices. While OR Royalties believes that the Mineral Resource and Mineral Reserves estimates, as applicable, in respect of properties in which OR Royalties holds royalties, streams, or other interests reflect best estimates performed by or on behalf of the owner of such properties, the estimating of Mineral Resource and Mineral Reserves is a subjective process and the accuracy of Mineral Resource and Mineral Reserve estimates is a function of the quantity and quality of available data, the accuracy of statistical computations, and the assumptions used and judgments made in interpreting available engineering and geological information. There is significant uncertainty in any Mineral Resource and Mineral Reserve estimate and the actual deposits encountered and the economic viability of a deposit may differ materially from estimates. Estimated Mineral Resource and Mineral Reserves may have to be re-estimated based on changes in prices of gold or other minerals, further exploration or development activity, or actual production experience. This could materially and adversely affect estimates of the volume or grade of mineralization, estimated recovery rates, or other important factors that influence such estimates. In addition, there is no assurance that any Mineral Resource estimate will ultimately be reclassified as proven or probable Mineral Reserves. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability. If operators reduce their Mineral Reserves and Mineral Resources on properties underlying OR Royalties' royalties, streams, or other interests, this may result in a material and adverse effect on OR Royalties' profitability, results of operations, financial condition, and the trading price of OR Royalties' securities. The Mineral Resources disclosed are based on the best available information as of April 11, 2025. Resources are exclusive of reserves in all cases. Gold equivalent ounces comprise mostly gold, other elements are converted assuming forecast long-term prices from analyst consensus published on March 3, 2025. Attributable GEOs were compiled without consideration for the potential mining or metallurgical recovery of the metals contained in the mineral resource or reserve.

(i) Mineral Resource and Mineral Reserve figures are only estimates. Such estimates are expressions of judgment based on knowledge, mining experience, analysis of drilling results, and industry practices. While OR Royalties believes that the Mineral Resource and Mineral Reserves estimates, as applicable, in respect of properties in which OR Royalties holds royalties, streams, or other interests reflect best estimates performed by or on behalf of the owner of such properties, the estimating of Mineral Resource and Mineral Reserves is a subjective process and the accuracy of Mineral Resource and Mineral Reserve estimates is a function of the quantity and quality of available data, the accuracy of statistical computations, and the assumptions used and judgments made in interpreting available engineering and geological information. There is significant uncertainty in any Mineral Resource and Mineral Reserve estimate and the actual deposits encountered and the economic viability of a deposit may differ materially from estimates. Estimated Mineral Resource and Mineral Reserves may have to be re-estimated based on changes in prices of gold or other minerals, further exploration or development activity, or actual production experience. This could materially and adversely affect estimates of the volume or grade of mineralization, estimated recovery rates, or other important factors that influence such estimates. In addition, there is no assurance that any Mineral Resource estimate will ultimately be reclassified as proven or probable Mineral Reserves. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability. If operators reduce their Mineral Reserves and Mineral Resources on properties underlying OR Royalties' royalties, streams, or other interests, this may result in a material and adverse effect on OR Royalties' profitability, results of operations, financial condition, and the trading price of OR Royalties' securities. The Mineral Resources disclosed are based on the best available information as of April 11, 2025. Resources are exclusive of reserves in all cases. Gold equivalent ounces comprise mostly gold, other elements are converted assuming forecast long-term prices from analyst consensus published on March 3, 2025. Attributable GEOs were compiled without consideration for the potential mining or metallurgical recovery of the metals contained in the mineral resource or reserve.

Notes on Mineral Reserves & Mineral Resources:

- * These values are estimates based on best available information as of April 11, 2025. The reader is advised to follow the provided links to find the source and descriptions of the individual estimates and the risks associated with the individual projects. Osisko can not verify and does not take responsibility of the accuracy of the estimates provided here.
- * Resources are exclusive of reserves in all cases.
- * Inferred Resources have not demonstrated economic viability, and there is no certainty that they can be upgraded to reserves.
